

How to add the Color Incorporated ad to your Blogger (Blogspot.com) Blog

1. Log into your blog's Control Panel through the following URL:
<https://www.blogger.com/start>
2. You should see a listing of all the blogs that you have ownership of on the Blogger.com network. Click on the “Layout” link under the blog in which you would like to include the ad.
3. Go to the area in the layout where the ad has been agreed to be placed. Click on the “Add a gadget” link in the box.
4. When the Gadgets box opens (you might have to turn off your pop-up blocker) scroll down the list until you see the “Picture” option. This link should bring up a box as pictured at right.
5. In the link text box, enter the following URL:
<http://www.colorincprolab.com>
6. Then make sure under the “Image” tab the “From your computer” box is selected. The “Shrink to Fit” checkbox should also be checked. Click the Choose button to bring up a file browser.
7. Navigate in this browser to the location of the image that was emailed to you from ColorInc. Select this image and hit the “Open” button.

8. A preview image should open in that window, as pictured below. Hit the “Save” button to add this image to your blog now. The window will say “Saving” for at least 30 seconds or more. Be patient! The upload will complete shortly!
9. If more than 5 minutes pass and the window still says “Saving”, close the “Configure image” window and move to step 10.

10. Navigate to your blog as any visitor normally would. You should see the ColorInc image in the location where you added it. If you do not see the image that you attempted to add, refresh the page. If the image still is not present, repeat steps 3-10.
